## Experience

### Ficus

A MOBILE STOCK TRADING APP

April 2018 - Present

( <https://itunes.apple.com/us/app/ficus-mini/id1380861174?mt=8>)

- **Description:** A Mobile Stock Trading Game app intended to be used by new or experienced investors alike. Designed to help stock enthusiast learn or refine their skills in investing and trading on the Stock market.
- **Technologies used:** Visual Studio Code 2018, React native, Loopback, MongoDB, Redis, Cron, Expo, Xcode, and Restful API ( iextrading )
- **About:** I Worked with a small team to build this app for an entrepreneur. My role in the creation was to be the frontend lead developer. The wire frame, navigation and the overall look and feel of the app were challenges that I faced and conquered while we created this app. The app is now live and available for download in the apple app store. The owner is using this app as a tool to get investors to get a start up going, the app is still regularly being improved upon and checked for any bugs that the MVP version develops.

### Daves Depot

E-Commerce web site

March 2018

( <https://davesdepot.herokuapp.com/> )

- **Description:** An e-commerce web app intended to be used by DIYers as well as professional vendors. Designed to be an online store for all type of products from the simple 2yr old painting to a professionally made sculpture anyone can buy and sell here.
- **Technologies used:** Visual Studio Code 2018, React Redux, React Strap, MongoDB, Less, Restful API (our own loopback) and payment method with stripe.
- **About:** A one week spirit to create a clone of the e-commerce website Etsy. The role that I played on this was back-end development. I was tasked with creating a database to store user information. Also one of the other major tasks was the signup and login features as well as the calculation of the check out page. This also was a great training exercise to learn to work as a team in unison and achieve the project goal in a timely manner. This project also served to teach the team real world production skills and experiences.

### Petco

Sep 2013 - Oct 2017

- Department Leader (Manager)  
As A Manager I was responsible for Pricing all products in the store. Making sure that products were stocked and in the right place. Working late night or early morning to make sure store was presentable for guests. Coordination with other leaders on tasks that needed to be completed in timely manners. Team leader on projects in the store that would include re-merchandising the store. Responsible for any and all store activities with staff or guests on event planned days. Addressing guest questions, complaints or concerns. Handling store income on daily bases such as deposits or any other matter concerning money. Making trips necessary to other locations to help out sister stores. Working with third party's to reach the desired goal from both ends on activities or events and with sales floor partner. Helping customers find products they were looking for or adjacent products if out of stock. Educate the customer with information about new products and how best to use them. Work with other partners to better improve the look and ambiance of the store.
